

Chromebook Handbook for Students and Parents

Chromebook Program
2017-2018 School Year

**Chester ISD
Chester, TX**

Introduction

Chester Independent School District seeks solutions to prepare our students for the world they face when they leave our halls. We want to help them acquire the skills they need to succeed - academically, professionally and personally. Each student will be issued a Chromebook computer to use both at school and at home as a learning tool to meet these goals.

Before your child's Chromebook is issued, both students and parents must read, accept and comply with the following district documents:

- **Student Use of Computerized Information Resource Policy**
- **Internet and School Network Ethics**
- **Computer, Internet and Email Use Agreement Guidelines and Procedures**
- **General Rules and Code of Ethics Agreement**

Parent and students also must sign the **Student/Parent Chromebook Use Agreement**.

These becomes are included in this packet.

The distribution of a Chromebook to each student is a privilege, not a right, and may be revoked at any time for inappropriate usage/conduct.

Any questions or concerns about the program should be directed to the principal, Brandi Havard.

Use of Chromebook Computers

Distribution, Repossession and Ownership of Hardware and Data

Chromebooks will be distributed in school, once the students and parents/guardians have read and signed the Student Use of Computerized Information Resources Policy' Internet and School Network Ethics' Computer, Internet and Email Use Agreement Guidelines and Procedures; Code of Ethics Agreement and the Student/Parent Chromebook Use Agreement. The Chromebook will remain with the students until the end of the school year, at which time notice will be given as to the process and timeline for the Chromebooks to be returned. Chromebooks must be returned to the district before the end of the school year. When a student leaves the district he/she will surrender the Chromebook to the District.

All data on the Chromebook is considered the property of the Chester Independent School District. **The Chromebook and its data can be searched at any time** and no data will be saved for the student. It is the student's responsibility to archive any data on his/her own personal removable media.

Electronic documents, network usage and all stored files **shall not be considered confidential and may be monitored at any time** by the designated district personnel to ensure appropriate use. The District complies fully with local, state or federal officials in any investigation concerning or relating to violations of computer crime laws.

Network Use

As part of the **Google Apps for Education (GAFE)** all students have their own online drive that is accessible through the student's personal login. This drive is a safe and secure place for students to save their work. Should the Chromebook experience problems and be out for repair, the students will be able to access their files in Google Apps for Education using a computer. Students are encouraged to save all important work to their GAFE drive on a regular basis.

Students should not loan their Chromebook to any other student, nor should they borrow a Chromebook from another student. In no circumstance should a student allow another student to log into his/her network drive, nor should any student share his/her login (user names and passwords) with any other student.

The safe and responsible use of the Internet is of utmost importance to the district. While at school, students are protected from potentially dangerous and inappropriate content through the District's network filter.

Parents are encouraged to be aware of and monitor their child's Internet usage at home. Home monitoring of technology use should be embraced and practiced.

STUDENT USE OF COMPUTERIZED INFORMATION RESOURCES

Computerized information resources can motivate student learning, expand opportunities for individualized instruction, provide new learning resources, and make abstract concepts more concrete. The Board of Education provides computer and Internet access as tools to enhance its mission to theca the skills, knowledge, and behaviors students will need as successful and responsible adults.

Student use of school computers shall be limited to work related to their academic program and their school-sponsored extracurricular activities. Students are responsible for appropriate behavior on the district's computer network. The Student Code of Conduct rules for behavior and communications shall apply.

The use of the network is a privilege, not a right, and may be revoked if abused. The student is personally responsible for all activity that originates from his/her account while accessing and utilizing the school's computer resources. These rules are intended to help ensure that students use school computers and the Internet in a safe and appropriate manner.

The Board of Education also provides students instruction in the proper and effective use of these resources. Generally, the same standards of acceptable conduct that apply to any school activity shall apply to use of the district's computer system. Students are expected to act in a respectful, responsible and legal manner.

Although the district exercises professional judgement in selecting computerized information resources, the nature of the Internet makes it impossible to control this resource fully. Access to the Internet will be granted for all students and all students agree to abide by the Student Code of Conduct and the district's Acceptable Use Policy. A parent or guardian may explicitly request their child not have access to the Internet. A formal written request must be submitted to the district.

Electronic material that uses transmit or store is not private. The district reserves that right to monitor use of its computer system to assure that is is being used in compliance with Board of Education policy and administrative regulations as well as applicable state and federal laws.

Misuse of the computer system can result in disciplinary actions, including restriction of computer privileges. Illegal action will be subject to police investigation and action.

Computer, Internet and Email Use Guidelines and Procedures

CISD provides extensive computer and Internet resources to its staff, students and community at large as part of its educational mission. When used appropriately and responsibly, these resources provide a wealth of information and access to state-of-the-art technologies that have become fundamental to the everyday educational experiences of our staff and students.

The district has the right and responsibility to monitor the use of its equipment and network for compliance to policies and procedures. Violation will result in disciplinary action.
